

# Heat Shield Paint – Adgreencoat® Verifications (Silo/Tank)

Surface temp 28°C reduction

Chemical Tank for cosmetic company (in Kanagawa)

Industrial Silo (in Miyazaki)  
600 sq. metre

Bread Plant (in Kanagawa)

Contribute to surface temp reduction!

(Verification) Silo

Concerned about the growth of mold and bacteria in the temp difference in summer, paint Adgreencoat® and reduce the temperature significantly.

(Verification) Piping installations

No one could maintain the pipes due to the extreme heat in summer. After Adgreencoat® application, bare hand maintenance became available, and the work efficiency is improved.

(Verification) Tanks

After Adgreencoat® application, the inside of the tank temperature improved and contributed to reduce the bacteria numbers.

Oil Company (Taiwan) Verifications

已噴塗 Adgreencoat 表面溫度：26°C

未噴塗表面溫度：42°C

- Date : 2011/8/3
- Before execution : 42°C
